

# The Bee & Butterfly Habitat Fund

*A NextGen Conservation Solution*

The Bee & Butterfly Habitat Fund is a nonprofit organization dedicated to the establishment of high-quality pollinator habitat to ensure that pollinator populations thrive. We work with private, public and corporate land managers to design and build healthy and sustainable pollinator habitat.

**Our NextGen pollinator habitats are a unique conservation solution with proven success, providing multiple environmental benefits:**

**Increased pollinator health**

**Improved water quality**

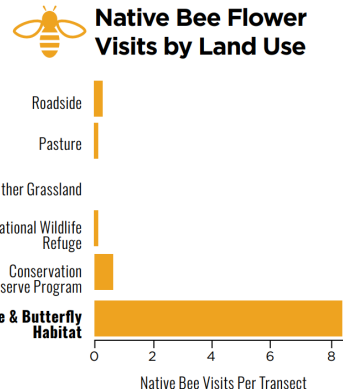

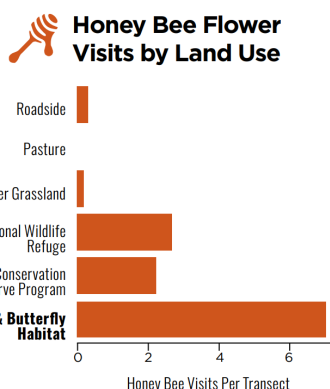

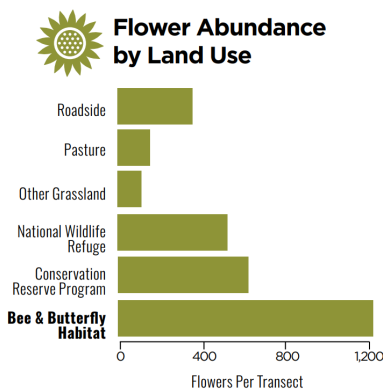

**Increased soil health**

**Increased food sustainability**

A recent research study done by the US Geological Survey shows that our NextGen pollinator habitats are up to 8x more effective than other habitats.

To find out more information about our habitat programs and how you can support our mission, visit our website at [www.beeandbutterflyfund.org](http://www.beeandbutterflyfund.org)

## Seed A Legacy Program

Our Seed a Legacy program works with private, public and corporate projects within a 14-state region across the country that have 2+ acres of land to help establish pollinator habitat using our NextGen seed mixture. Each project receives FREE or greatly reduced seed and one-on-one technical guidance to maintain the project over the next 5 years. With your support, we can expand into more states and plant even more high-quality habitat.

**Since 2017, the Seed a Legacy program has planted**

**7.5 billion**  
total seeds

**4,955**  
acres of habitat

**16.7 million**  
milkweed seeds

## Solar Synergy Program

The Solar Synergy program works with utility-scale solar projects to establish large scale pollinator habitat across the country. A first of its kind, this innovative program provides multiple benefits including the extensive monitoring of pollinator population responses, carbon sequestration documentation and increased opportunity for honey production.

## Support our mission

Help us plant high-quality pollinator habitat across the country! A donation of \$100 helps us to plant 762,000 wildflowers, which is a 1/2 acre of high-quality habitat for honey bees, monarch butterflies, and other pollinators. You can make a real difference!
