

HONEY BEES ARE IN TROUBLE, LOCAL BEEKEEPERS NEED YOUR HELP

**2 ACRES
SUPPORTS
5 HIVES PER
YEAR**

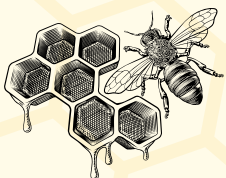

NextGen Conservation projects work with multiple stakeholders to produce increased pollinator health and habitat benefits that lead to better outcomes for honey bees and honey production.

Sign up today for **FREE** seed in the Seed A Legacy program!

Habitat decline is a major factor in pollinator health decline. A small portion of your land can make a big difference!
